2-USB + 1-Parallel Port Print Server

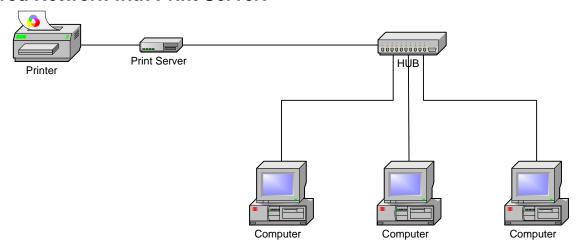

Quick Installation Guide

V1.2

Before you start, you should prepare the following items:

- One Windows-based PC with print server setup CD
- One printer
- One printer cable
- One HUB

Wired Network with Print Server:

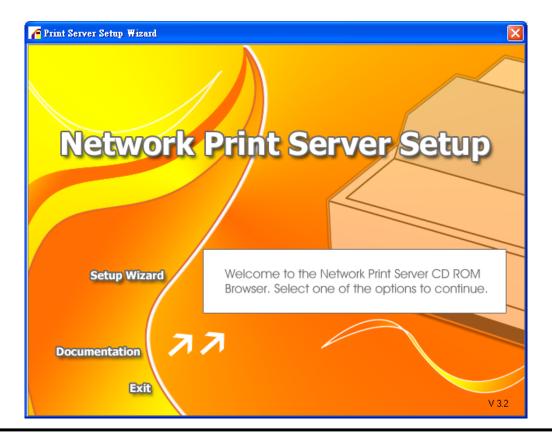

Hardware Installation:

- 1. Turn off the printer's power.
- 2. Connect the print server to your printer with the supplied printer cable.
- 3. Turn the printer's power on.
- 4. Plug the AC power adapter into the power connector on the print server.
- 5. Wait 10 seconds as part of the print server's Power On Self Test (POST).

Software Installation:

- To enable network communication with print server, your computer must have a proper IP address, e.g. 192.168.0.100
- 2. Insert the setup CD into your CD-drive, and the following message appears.

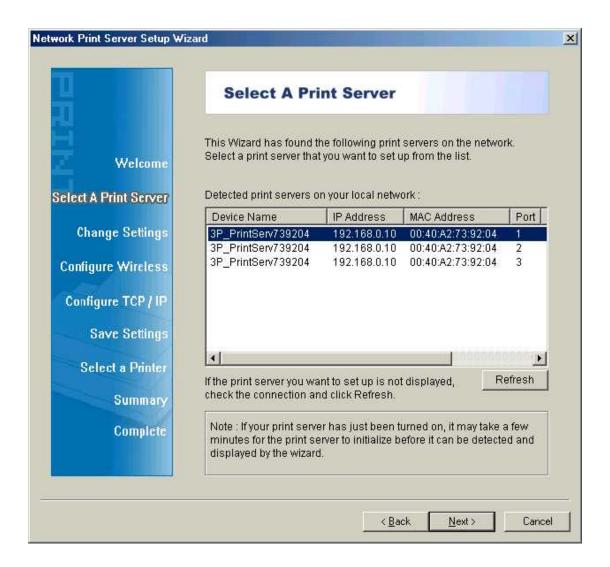

Note:

For setup wizard under Windows Vista, you have to choose the **Run as administrator** by right-click the icon on desktop.

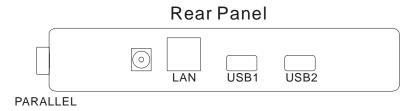

3. Choose **Setup Wizard** to install the print server and configure the connected printer.

- 4. Click **Next**, the wizard will automatically discover the print server.
- 5. From the **Select A Print Server** screen, select the print server and its port number that you want to configure and click **Next**.

Note:

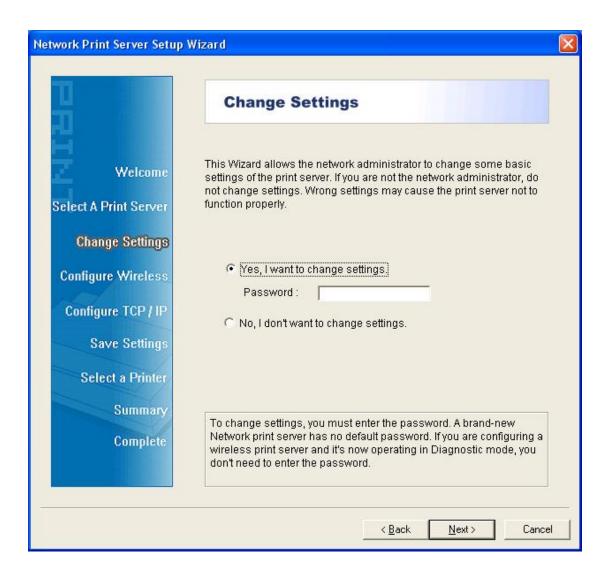

PARALLEL is Port 1(PID1)

USB1 is Port 2(PID2)

USB2 is Port 3(PID3)

6. On the **Change Settings** screen, select **No** or **Yes**:

Click **No** if you want the print server to keep using the default IP address and keep the default settings, and then click **Next**.

IP address: 192.168.0.10Subnet Mask: 255.255.255.0

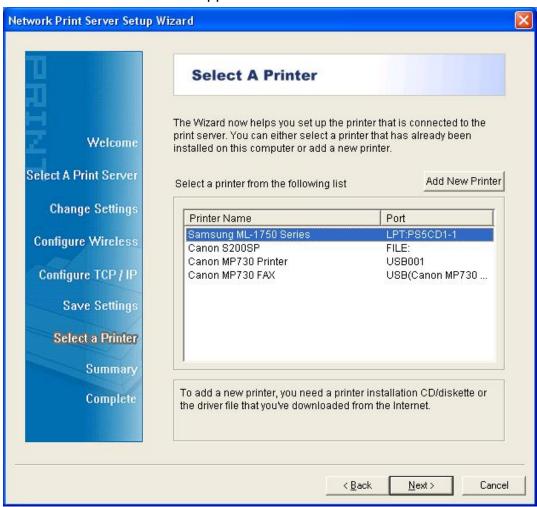

Click **Yes** if you want change IP address to the print server, and then click **Next**.

Note:

- 1. The IP address of print server must be within the same subnet as your network adapter.
- 2. After you save the new IP address, the print server will automatic reboot once to make ready for the new IP address. It may take a couple of seconds.
- 7. On the **Select A Printer** screen, select an already configured printer from the list, click **Next** and then **Finish** to complete the installation.

Select Add New Printer if the print server is connected to a printer that hasn't been

installed before and does not appear in the list.

8. Click Add New Printer to launch Windows Add Printer Wizard.

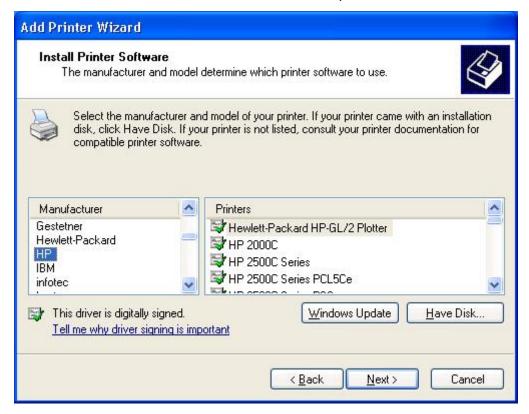

9. Click **Next** and select **Local Printer**, make sure the **Automatically detect and install my Plug and Play printer** check box is **NOT** checked. Then click **Next**.

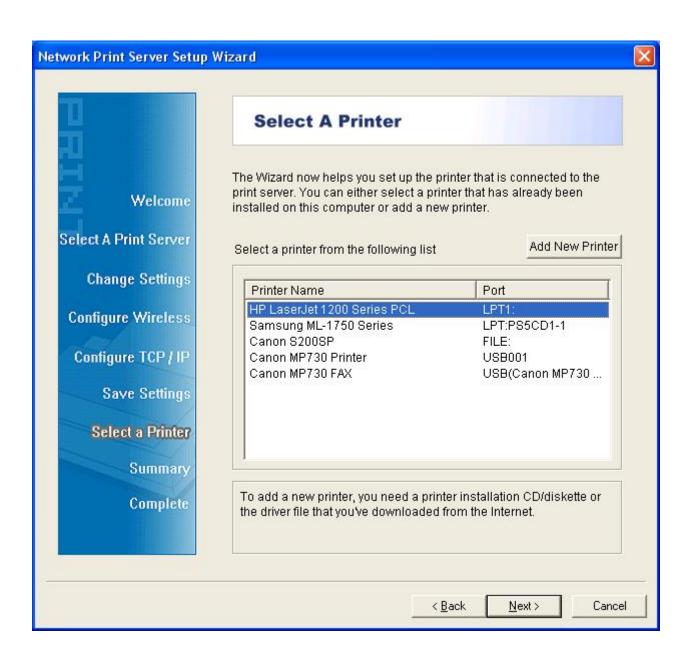

10. Make sure the **Use the following port** radio-button is clicked and select **LPT1:** (Recommended Printer Port) from the pull-down list. Then click **Next**.

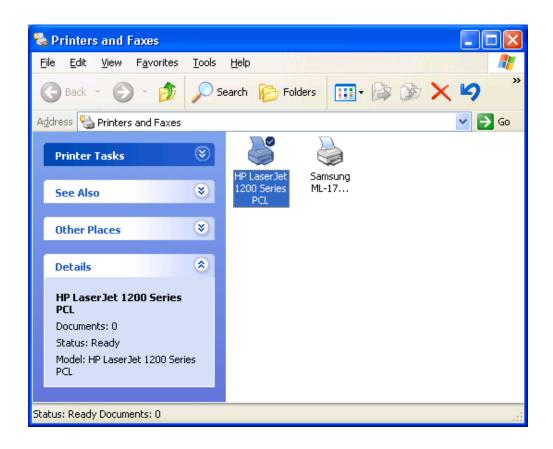

11. Select **Manufacturer** and **Printer** from the lists of printer's driver. Then click **Next**.

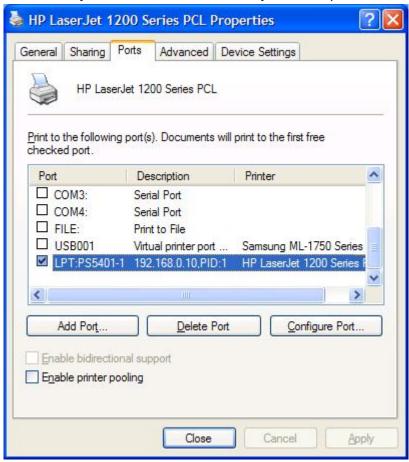

- 12. If you already have the printer's driver installed, you will be asked whether to keep it or to replace it. Click **Next**. Supply a name for the printer and choose whether you want to make it your default printer. Then click **Next**.
- 13. Then, choose whether you want to share the printer with other network users, print a test page (please select **No**.), etc. Select the appropriate radio-button and click **Next** and **Finish**.
- 14. In the setup wizard, finish the installation by highlighting the installed printer in the **Select a Printer** list and click **Next** -> **Finish**.

15. From Windows system, go to **start** -> **Printers and Faxes** and highlight your newly installed printer.

16. Right-click, select **Properties** -> **Ports** and verify that the print server's port appears.

17. Go to **General**; click **Print Test Page** to verify the configuration.

18. Done.

Note:

If you wish to install more print servers, start setup wizard from your Windows Start menu: start -> All Programs -> Network Print Server -> PSWizard and repeat the installation procedure.
