# Quick Installation Guide

Wireless 2.4GHz Auto-Gain Booster

1. **Connect the Booster to the Antenna and AP:**
   o Attach the antenna cable to the "ANT" port on the Booster.
   o Connect the "AMP" port of the Booster to the "TO AMP" port of the Injector.
2. **Connect the Injector to the Access Point (AP):**
   o Attach the "TO AP" port of the Injector to your wireless Access Point (AP) using the appropriate cable.
3. **Power the System:**
   o Plug the power adapter into the "12 VDC IN" port on the Injector.
   o Connect the adapter to a power outlet.
4. **Check LED Indicators:**
   o Ensure the "RX" & "PWR/Radio" & "PWR/In-Line," and "Injector" LEDs are illuminated to confirm power is on.
   o The "Tx" LED (RED) will flash when the system operates correctly.

- Rx & PWR / Radio & PWR / In-Line & Injector LEDs will be turned on when Power on
- Tx(RED LED)will flash when system operates well
